# Git pull from old commit

Refer :- <https://stackoverflow.com/a/38333126/17656267>

## Example and steps

```
git pull [Branch Name]
```

### Step 1: fetch list of commits:

```
git log
```

**You'll get list like in this example:**

```
[Comp:Folder User$ git log  
commit 54b11d42e12dc6e9f070a8b5095a44  
Author: author <author@gmail.com>  
Date: Fri Jul 8 23:42:22 2016 +0300
```

This is last commit message

```
commit fd6cb176297acca4dbc69d15d6b7f78a  
Author: author <author@gmail.com>  
Date: Fri Jun 24 20:20:24 2016 +0300
```

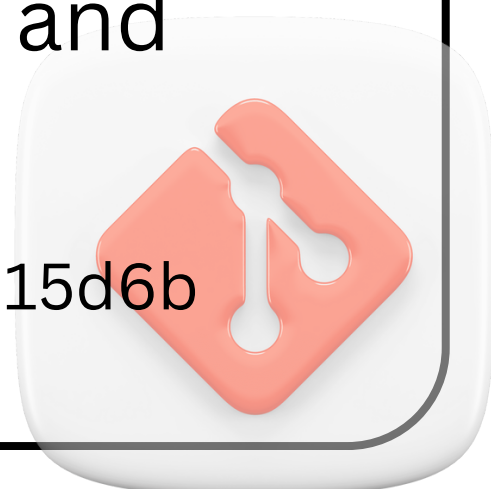

This is previous commit message

```
commit ab0de062136da650ffc27cfb57feba  
Author: author <author@gmail.com>  
Date: Thu Jun 23 00:41:55 2016 +0300
```

This is previous previous commit message  
...

### Step 2: copy needed commit hash and paste it for checkout:

```
git checkout fd6cb176297acca4dbc69d15d6b
```

# Git branch

## New Branch Create

```
git checkout -b [new Branch name]
```

## Change Branch Create

```
git checkout [Branch name]
```

**(or)**

```
git switch [Branch name]
```

## To see local branches, run this command

```
git branch
```

## To see remote branches, run this command

```
git branch -r
```

## To see all local and remote branches, run this command

```
git branch -a
```

## git - pulling from specific branch

```
git pull origin daily
```

## Create and Change Another Branch

```
git checkout -b [new Branch name]
```

---- This is Change Locally-----

```
git checkout [change Branch] ♠
```

```
git push -u origin [new or change Branch name]
```

----- First -----

```
git status
```

```
git add .
```

```
git commit -m 'any msg'
```

```
git push origin [Branch name]
```

## How contribute Gitcode Branch

```
git clone -b [Branch name] [url]
```

## Undo Pull Force

```
git reset --hard HEAD
```
